

# Top 10 Important AI Tools You Should Learn and Use

## Hook:

The world is moving forward with AI, and those who are still not adapting to it or not using it to its full potential will soon become like the isolated tribes of the Amazon. This is a dark reality that people will realize in the next five years because, in the future, there will be only two types of people:

1. Those who know how to use AI.
2. Those who don't.

And those who don't will lose their jobs and businesses.

If you want to secure your job and business in the future, then make sure to watch this video till the end. In this video, I will share **10 important AI tools** you must learn and use. Not just that, I will also reveal **tips and tricks** to help you use these tools to their full potential.

But remember, if you skip any part of this video, you might miss valuable information. So, stay tuned till the end.

## Content:

### 1. ChatGPT

Let's start with the first and most basic AI tool – ChatGPT.

This tool has pushed human civilization 10 years ahead in terms of technology. If ChatGPT had never been launched, AI might not be a popular topic today!

- **But what exactly is ChatGPT?**

In simple words, ChatGPT is like a supercomputer that has learned almost all of the world's knowledge. It knows what's happening in the world and can logically answer any question you ask.

Unlike Google, where you have to visit different websites and search for answers, ChatGPT gives you direct and precise answers instantly! Just type

your question, and within seconds, you'll get a logical and well-structured response.

(Show the chatgpt video)

ChatGPT also has a mobile app with a built-in voice assistant, so you can even talk to it and get answers on the go.

But ChatGPT isn't just for answering questions! You can assign it any task.

Such as **Writing & Content Creation, Learning & Research, Problem-Solving & Brainstorming, Coding & Development, etc.**

### **Why Should You Learn ChatGPT?**

- ✓ Save **hours of work** by automating tasks.
- ✓ Improve your **writing, research, and analytical skills**.
- ✓ Stay ahead in **business, content creation, and technology**.

The best part? **ChatGPT is FREE to use!** (Although there's a paid version with advanced features like GPT-4 for better responses.)

## **2. Adobe Firefly**

Ever captured an amazing photo, but due to small mistakes or unnecessary elements, you didn't upload it? Adobe Firefly is here to fix that!

What makes Adobe Firefly special?

- Remove unwanted objects in just seconds: just select the area, and Firefly will make it disappear!
- Add new elements with AI prompts. For example, if you want to add a sea in the background, just type "ocean waves", and Firefly will create it with perfection!
- Change your image orientation using the expand tool - if you need a wider or taller image, Firefly will auto-generate missing parts!

If you want to edit images like a pro but don't know Photoshop, Firefly lets you do high-level edits without any editing skills! So whether you want to fix an image, remove distractions, or generate creative edits Adobe Firefly is the ultimate AI tool for designers and creators!

## **3. Invideo Ai**

If you think Adobe Firefly was impressive, hold on because this next AI tool will blow your mind

Meet InVideo AI a tool that lets you create full videos from just a single text prompt!

### How does InVideo AI work?

- You don't need editing skills just type a description, and AI will generate a complete video!
- It automatically adds stock footage, effects, transitions, and voiceovers based on your input.
- You can even create AI-generated animations with just a few clicks!

### How to use InVideo AI?

1. Go to InVideo AI's website (link in the description).
2. Click on "Create AI Video" and choose Version 3 for the best results.
3. Select from different workflows (e.g., cinematic, animation, storytelling).
4. Enter your prompt for example, "Create a short horror story with suspenseful visuals."
5. Click Generate and let the AI do its magic!

(Show the ai generated video)

Mind-blowing, right? Just by typing two lines, I got a fully ready video with:

- ✓ A complete script 📝
- ✓ Professional voice-over 🎙️
- ✓ Character establishment 👤
- ✓ Engaging storytelling 🎭

Normally, if you were to create a video like this, you'd need to:

- Hire a scriptwriter 📝
- Find a voice-over artist 🎙️
- Pay a video editor 🎬

But here, InVideo AI replaces all three roles and does everything in seconds!

In Invideo You can also edit your generated video

You can choose "Generate Media" to let AI create custom video clips or select "Stock Media" to merge pre-existing footage for a more professional look.

Whether you need social media reels, YouTube shorts, or cinematic edits, InVideo AI will create professional videos in minutes without any editing skills.
